

EduGenie

Project Demonstration Phase

1. Introduction

The Project Demonstration Phase is the stage where the completed EduGenie application is presented to teachers, project guides, evaluators, or users. The main features and working process of the system are demonstrated practically.

2. Objectives of Demonstration

- To present the completed EduGenie project.
- To explain the main features and functionalities.
- To demonstrate how the system works.
- To show the benefits of using EduGenie.
- To receive feedback from evaluators and users.

3. Demonstration Preparation

Before the demonstration, the development team:

- Checks whether all features are working correctly.
- Prepares sample user data.
- Verifies the AI assistant and quiz modules.
- Checks the database and application interface.
- Prepares a project presentation.

4. Demonstration Process

Step 1 – Project Introduction

Explain the problem, objectives, scope, and purpose of EduGenie.

Step 2 – User Registration and Login

Demonstrate how a student creates an account and logs into the system.

Step 3 – Student Dashboard

Show the dashboard and explain the available learning features.

Step 4 – AI Learning Assistant

Demonstrate how students can ask questions and receive AI-based learning support.

Step 5 – Study Materials

Show how students can access notes and other learning resources.

Step 6 – Quiz and Assessment

Demonstrate taking a quiz and displaying the score.

Step 7 – Progress Tracking

Show how student learning progress and performance are recorded.

5. Key Features Demonstrated

- User registration and login.
- AI-based learning assistance.
- Study materials.
- Personalized learning support.
- Quiz and assessment.
- Score calculation.
- Progress tracking.
- User-friendly interface.

6. Feedback and Evaluation

During the demonstration, feedback is collected from the project guide, evaluator, or users. Suggestions and identified issues are recorded for future improvements.

7. Expected Outcome

The demonstration should clearly show that EduGenie is a functional and user-friendly AI-based educational platform that supports students in learning, practicing, and monitoring their progress.

8. Conclusion

The Project Demonstration Phase provides an opportunity to present the completed EduGenie system and explain its working process. A successful demonstration helps evaluators understand the project's features, functionality, and practical usefulness.
