

Brainstorming and Ideation Phase – EduGenie

Introduction

EduGenie is a Google Gemini-powered Learning Assistant designed to help students learn easily and effectively.

1. Problem Identification

- Students may find it difficult to understand complex topics.
- Finding quick and reliable study materials can be challenging.
- Students need personalized explanations and learning support.
- Doubts may arise while studying independently.

2. Idea Generation

The team discussed ideas for an AI-based educational assistant that could:

- Answer students' questions.
- Explain difficult concepts in simple language.
- Provide summaries and study notes.
- Generate practice questions and quizzes.
- Give personalized learning assistance.

3. Proposed Solution

The idea of EduGenie was selected as a platform that uses Google Gemini AI to provide interactive and personalized learning support.

4. Key Features

- AI-based doubt clarification
- Simple explanations
- Summarization of study content
- Quiz and question generation
- Personalized learning assistance
- Interactive student–AI conversation

5. Expected Outcome

EduGenie aims to make learning easier, faster, interactive, and more accessible for students.
